

2008 WaterReuse Small Project of the Year

Carnation Treatment Plant – Carnation, Washington

Strong Partnering Achieves an Outstanding Facility

ADVANCED TREATMENT

MBR treatment and UV disinfection produces 0.5 mgd of Class A reclaimed water to support City growth and environmental preservation.

WETLAND ENHANCEMENT

Reclaimed water will enhance on-site flows and restore wetlands at the Chinook Bend Natural Area ecological preserve.

SUSTAINABLE SOLUTIONS

The building incorporates rural community aesthetics and sustainable LEED™ elements to enhance its surrounding environment.

INTERAGENCY PARTNERSHIPS

King County, the City of Carnation, and Ducks Unlimited worked closely together, combining engineering and wetland expertise to develop a new facility – balancing community needs and environmental concerns.
